

## ■ Innoplast Protector

1/1

### Bottle with metering cap - 250 ml

Innoplast Protector is a high-grade protection product for almost any type of plastic. It contains no silicone, no wax and no alcohol. Innoplast Protector helps to keep plastic and rubber supple and dirt-repellent. Because of its unique composition, the product restores the original shine of the treated surface without leaving any streaks or greasy film.

Innoplast Protector restores almost all important qualities of the treated plastic, thus allowing it to regain its original properties, including durability and appearance. Therefore, the product is highly suitable for permanent protection of plastic parts such as bumpers, protective and decorative strips, handles, trim parts, frames, kitchen unit plinths, etc. as well as rubber door seals or weather strippings. Also preventive maintenance of rubbers is very important for their lifetime.

Innoplast Protector is ready to use immediately. Thanks to the special cap on the packaging the product can be accurately dosed and is therefore extremely economical. Innoplast Protector works best in combination with an Innotec Spot Handpad (art.no. 90.4020 ) or a dry Innotec Multi Wipe (art.no. 04.1303). Properties:

- Feeds and protects almost any type of plastic and rubber.
- Free of silicone and wax.
- Pleasant and fresh smell.
- Leaves no streaks or greasy film.
