

■ **Deblock Oil**

Aerosol - 500ml

Deblock Oil is a mix of quick rust dissolvers and lubricants, which has a high penetrating effect due to its low surface tension and is therefore perfectly capable of dissolving tightly seized parts in the least accessible places.

Deblock Oil contains graphite. This means that not only is it more powerful, but it has a slightly lubricating effect for applications requiring lubrication such as seized brake components and other truck or trailer parts prone to oxidation.

The product can be applied on all types of metal. It can also be applied to sensitive joints such as steel bolts in aluminium, to prevent damage when unbolting.

Because many mounting points are difficult to access, or are located underneath an object, the aerosol packaging is specially designed to operate in any position. These points are easy to reach thanks to the special unbreakable nozzle and small tube.

You can also use Quick-Grip when unscrewing seized screws or bolts. This special friction paste restores grip on damaged bolts, screws, screwdrivers and ring spanners, for example. With Quick-Grip on the head of a seized bolt or screw you can obtain maximum grip and so considerably increase your chances of removing it intact and with the least possible damage.

Properties:

- Strong rust remover, loosens seized parts.
- Quick effect on rust, dirt, etc.
- Does not adversely affect rubber.
- Applicable on all types of metal.
- Repels moisture.
- Lubricates during disassembly.
- Ideal for difficult applications such as aluminium to steel connections.
